

PCA plot showing the first two principal components (PC1 and PC2) of the data. The x-axis represents PC1 (ranging from -0.1 to 0.2) and the y-axis represents PC2 (ranging from -0.1 to 0.1). The plot displays two distinct clusters of points, colored purple and yellow, representing different groups or conditions. The purple cluster is located in the upper-left region, and the yellow cluster is in the lower-right region. The plot includes a grid and labels for various data points, indicating specific samples or replicates.
